Helpful Handy Hints[©]

Finding Reinforcers

This is an area that is often problematic for many of our students. The key is to observe their behaviours when left to their own devices and then to use these as a starting point. Remember that a student's reaction to sensory input can vary between days and even within a day, and therefore whenever sensory strategies are being used, careful observation of the student's reactions is advised. For students with variable or inconsistent reactions to sensory input, an assessment with an Occupational Therapist may be advisable.

Behaviours Observed	The student gazes at lights or out of the window, fixates at rotating objects, looks at his hands or flaps his fingers in front of his eyes.		
Type of self-stimulation	Visual		
Spinning discs Laser discs Spinning toys Sand Egg timers or oil droppers Snow globes	Light toys (such as spinning fan or ball) Flashing toys (such as bouncing ball or stress toy) Spinning tops	Executive toys (such as swinging balls) Sparking toys (such as toy gun or spinning toy Kaleidoscope	Useful websites SEN Switcher http://www.northerngrid.org/ ngflwebsite/sen/intro.htm
TV or video Computer screensaver programmes	Wind-up toys Coloured acetate sheets	View Master Coil toys	Priory Woods School http://www.priorywoods.mid dlesbrough.sch.uk

Behaviours Observed	The student vocalises, hums, clicks his tongue, taps furniture or clicks fingers		
Type of self-stimulation	Auditory (Sound)		
Drum	Toys that make noise	Talking toys (such as	Stethoscopes
Triangle	Clackers	Furbies)	Music
Musical instruments	Bells	Buzz toys	Conversation with another
Radio	Whistles	Toy piano or keyboard	person
Push-pull toys that make noise	Tambourine	Music boxes	Talking books
	Hair dryers	TV or video	Walkman or CD player

Behaviours Observed	The student touches his own or another person's body parts, pinches himself, places his fingers or objects in his mouth.		
Type of self-stimulation	Tactile (Touch)		
Shower scrunchies	Items that touch the	Hand painting	Sand or water play
Soft toys	students' body	Face painting	Offcuts of different textured
Puppets	Koosh ball	Blankets	materials (such as fur, felt,
Talc	Silly putty	Make up brush	cotton, nylon etc)
Electric fan	Vibrating or buzz toys	Hand or foot massage	Scrubbing brush
Shaving cream	Massager	Hand lotion	Pan scourers

Behaviours Observed	The student rocks, bounces or spins his body. He has strange postures (such as		
	head stands or upside-down), toe walks, holds head on one side or head bangs.		
Type of self-stimulation	Vestibular (Movement) or Proprioceptive (Body Sense)		
Items that recreate motion or	Therapy or Pilates ball	Barrels to roll in or on	Slide
body position	Hammock	Pedal cars	Roundabouts
Rocking horse	Swing	Spinning office chair	Trampolines
Rocking chair	Action rhymes	Balance ball	Push/Pull games against
Firm stroking or patting of body	Vibration or buzz toys		resistance (such as another
parts student allows or seeks			person)

Behaviours Observed	The student smells self, other people, items or equipment Smell			
Type of self-stimulation				
Items that smell Scented pens and crayons	Aromatherapy oils Incense	Playdough Scented candle	es	Flowers Make a "Smell Kit"
To make a "Smell kit" use some small containers with lids (such as empty camera film containers), place some scented items in the container and top with cotton wool. Keep lid closed until needed.	PeppOnior	s and Spices ermint	Cak	p or Washing up liquid e essences (such as vanilla, ee, coconut etc)

Behaviours Observed	The student licks himself or other people. He may lick objects or put them in his mouth.		
Type of self-stimulation	Oral-motor or Taste		
Sweet and sour contrasts (such as lemon or lime juice) Hot and cold contrasts (such as fried ice cream!)	Items that have different tastes Strong flavoured crisps or sweets	Put lots of ice into cold drinks Thick shakes through a straw	For oral stimulation try: Aquarium air tubing to chew Teething rings and toys Chewing gum or sweets Textiles to chew Tooth and tongue brushing Try an electric toothbrush
